For example, this is the Boeing 787 Dreamliner's wing in 3d view: Which reminds me that I needed to configure my CAD software to be able to use the structure as a solid because CAD software tends to draw lines for "lines". But since I'm using SketchUp, it is already able to use the structure as a solid, so there is no need to configure the CAD software for that. Edit:... In the end I did convert the image to a JPG and selected "Save to disk" then I opened the file in Paint.NET and I selected "Save as". My.png files are just supposed to be resolutions of a simpler

one. I should have tried that first, but I did not. When I opened my.png in the TextGauge (link) with the Menu->Page Setup->Page Size, I could see the conversion to a.png reduced the width by 500 pixels but kept the same height. Hmmm, I wonder if there is a way to keep the original width and reduce the height... Last note: After some more digging, I found that in Windows Paint, I could go into Text/Paste Options and change the Pixel Aspect Ratio. In another application in Windows, I could not change this ratio, but I assume this would work in other computer software (Google SketchUp, etc). A: I found it! (Thanks for your help-Ewan!) I realized

that my Noun Project file was from when I installed it a long time ago and, since it was originally for a Windows operating system, maybe I left this setting when I did the upgrade... I simply went to Noun Project's website and clicked Download CAD file. I did not have to do anything. It produced the CAD file with the selected setting: So I opened the CAD file in SketchUp and I changed the size according to the option SketchUp was suggesting: The size was different. I lowered it according to the SketchUp suggestion: The result is a picture that looks like the following: If I resize the window with the "Zoom In" or "Zoom Out" option, it would go back

to the original size. I am fine with that for now. If it is still too big for my needs, I can simply delete it. I'm addicted to creating by hand. Sometimes I'm making things for myself, sometimes for my shop. Sometimes I 3da54e8ca3
