FIFA 13 Update V1 7-RELOADED

FIFA 13 is best played on TVs, and now it can be through the Gamepad on the Xbox One. The Gamepad is the controller for the Xbox One, and it can be wireless or wired, as it can be used for a number of other things. The system has two controllers, one per side, but if you're using the Gamepad, there's no touch functionality. With the new motion control, players can now move the camera as if they're actually viewing the game world through a third-person camera. It's called Aiming and it's a major change to the control system of FIFA 13. To make sure it feels natural, we've added new mechanics and animations to make it easier to go for a through ball with the flick of a wrist or to do an overhead flick of the ball that will give the player an extra boost. In FIFA 13, players are encouraged to be proactive and decide which goal they want to attack. In FIFA 13 Update v1 7-RELOADED, they can choose between having only a single player, giving the ball to everyone, or taking control from the goalie. Also new is the taking of a free-kick. If a defender inadvertently lets the ball cross his penalty area, it will automatically fly into the goal. In FIFA 13 Update v1 7-RELOADED, we've added a new feature called Covering. In practice this means that if your team are to press the ball higher up the pitch and lose possession, a defender will "recover" the ball for you. That will give you a chance to regroup and the game will delay the clock for a while. It's essentially a way of slowing down the game, and it's up to you what you want your team to do. You can also use the Covering system in practice training, and it will make the game more tactical. 5ec8ef588b
