
Physics Of Nuclei And Particles Marmier Sheldon Pdf 11

[Download](#)

the results of a computation of fusion-fission asymmetry and excitation function from carbon ions on neon isotopes are given. the ground state of ar-37, ar-38, ar-39, ar-40, ar-41 and ar-43 are obtained from the potential barrier calculation by the method of energy equation. the excitation function of ar-40 is also obtained. the hoyle state is found in ar-41 with a binding energy of 0.23 mev. the binding energy of the ground state of ar-42 and the excitation function of ar-43 are computed to be 13.3 and 7.4 mev respectively. the nuclear structure of ar-43, ar-45 and ar-47 are discussed. the decay properties of ar-45, ar-46 and ar-47 are considered in this article. the neutron decay properties of ar-48 are discussed in this paper. the asymmetric two-body potential energies of ar-50 and ar-54 are studied. the computed energies for the ground and first excited states of ar-54 are found to be 5.94 mev and 3.07 mev respectively. the effect of including the continuum states in the two-body potential energy and in the single particle states of the nuclei in the continuum are investigated. the problem of potential bias is encountered when the continuum threshold, q_c , is set to be equal to the two-body interaction threshold, q_0 . in this work, the two-body energy curves and energies obtained from potential model calculations are used to determine the value of q_c . the reviewers comments on the manuscript are important for the improvement of the article. the first-hand information on the paper, comments, and suggestions of the reviewers will be helpful in deciding the final decision on the publication of the manuscript. the article should be held for the proceedings of reviewers conference and publication of the revised manuscripts will be considered only after the editorial office has evaluated the comments of the reviewers.
